

Zebra® RFID Ready Printers

Investment Protection for Your RFID Needs

Lock in investment and asset protection with Zebra RFID Ready printers.

Zebra's **RFID Ready** products allow companies to invest in the bar code printers they need now while providing a migration path to the RFID technology they will need in the future. **RFID Ready** models are modified for easy upgrade to a multi-protocol reader/encoder that supports EPC-compatible and other ultra-high-frequency (UHF) standards. The reader/encoder supports the RFID protocols that are most current at the time of installation, and can be Flash-upgradeable to support future protocols. **RFID Ready** products allow companies that are still in the RFID discovery process to ensure that they have the right technology to support their implementations even as their requirements change.

With Zebra's **RFID Ready** products, companies can

- Protect investments in the bar code printers they need now, while having a migration path to the RFID technology they will need in the future.
- Take advantage of proven printer platforms that provide all the rugged reliability they've come to expect from Zebra.
- Be assured their printing solutions are built on Zebra's 35-year heritage as an innovative leader in bar code and RFID solutions. To date, Zebra has sold more than 4 million printers—including a broad array of RFID, mobile, wireless, and industrial-strength solutions—to top companies in 100 countries.

High-performance **RFID Ready** printers have been designed for case- and pallet-level identification for companies needing to streamline logistics and supply chain management as well as other applications including:

- Asset tracking
- Inventory management
- Work in process
- Shipping/Receiving
- Distribution

RFID Ready models can be upgraded as needed with a fully integrated reader/encoder for transponder types:

EPC Class 1
EPC Class 0
Matrics® 0+
ISO 18000-06B
EPC "Gen2" via firmware update
