

X1JET HP Stitch

Reason:

The X1JET HP-Stitch fulfils, with a high-grade milled and anodized aluminum housing, the demand for a space-saving and slim X1JET.

Description:

Markoprint introduce with the X1JET HP Stitch a further development of the XJET-series.

The patented cartridge mounting “Click’n Print” makes possible to install the electronics space-saving behind the cartridge.

This is especially advantageous by an installation of several printers, i.e. at a multilane deep-drawing packaging line.

Different print layouts with a print height of 12.5 mm can be print simultaneously.

It isn't suitable to create print layouts over several print heads.

The deflector is reduced to the width of the print head. The X1JET HP Premium deflector can order alternative.

A sensor isn't integrated, but can connect optional external.

The functions are identical to that of the X1JET HP Premium.

A control box for a connection of 4 or 8 X1JET HP Stitch is planned.

The box has an input for the voltage and each one input for sensor and encoder.

The power supply and sensor / encoder signals can connect over 4 or 8 15pol Sub-D connector.

Furthermore the box has an Ethernet switch with one input and 4 / 8 outputs.

Availability:

The X1JET HP Stitch is available from calendar week 09/14.
